(5) Main Problems in Enterprise Investment Activities & Suggestions

Since 2006, IRICO Group Corporation has faced the tremendous pressure from the shrinking LED market. Adopting “Building Better LEDs, Bringing Innovation to the Industry” as the operating mantra of the enterprise for the present and foreseeable future, [the company] decided to search for a new suitable industry for IRICO to develop in the fields of optoelectronics, new display devices, and other related fields. IRICO Group Corporation is currently in a period of strategic adjustment – the Group is actively developing innovation in the industry, its investments projects are numerous, and its demands for funds are high. Therefore, we hope that the governments at all levels can lend support, in the form of both policy and funding, to enable IRICO to transition into a new field of development as soon as possible.

(4) Implementing Investment Activities

IRICO Group's investments first undergo extensive market research, industry analysis, economic evaluation, and feasibility study. Then, decisions are made by combining expert analysis with administrative decision-making – experts and consultants are organized to discuss different aspects of the investments such as

005

technology, production, and markets. The investments are then submitted to IRICO Group for approval. Since 2006, experts from higher education institutions, design institutes, and trade associations have been invited to discuss investment projects. After discussion, IRICO Group discusses and makes its decisions and subsequently reports them to the Committee. After approval of the project for implementation, the projects are organized and implemented by implementing units of the projects, and functional departments of the IRICO Group supervise this process. With respect to the use of funds, the projects are implemented with strict adherence to the projects' capital utilization plans. The contract management department approves contracts based on the capital utilization plans to ensure that funds are used appropriately.

(5) Investment Risk Management & Control

1. Major Financial Data of the Enterprise for 2006

Table 4: Major Financial Data of IRICO Group for 2006

Data Name	2006	Remarks
Primary Business Income (in RMB millions)	5,084.9531	
Total Profit (in RMB millions)	99.6846	
Net Profit (in RMB millions)	119.3741	
Total Assets (in RMB millions)	8,291.9791	
Total Amount of State-Owned Assets (in RMB millions)	3,798.5367	
Total Liabilities (in RMB millions)	2,791.2746	
Net Assets (in RMB millions)	3,798.5367	
Total Owner's Equity (in RMB millions)	3,798.5367	
Debt Ratio (%)	33.66	

2. Controlling the Size of Total Investment to Maintain a Reasonable Debt Ratio

According to the *IRICO Group Corporation's Development Plan for 2007-2009*, IRICO Group is a large-scale enterprise engaged in production and manufacturing. Maintaining a reasonable debt ratio is necessary to achieve healthy development of the enterprise. A debt ratio of less than 50% is in the "normal investment zone" for the enterprise. The enterprise should be concerned if the debt ratio reaches 65% and consider carefully any decision to invest further. A debt ratio that exceeds 65% is in the "serious control investment zone" for the enterprise, and in principle, the enterprise should not form any new liabilities for investment purposes. From Tables 1, 2,

Scan created by CamScanner⁵

and 4, it is evident that the debt ratio for IRICO Group in 2006 was 33.66%, which is the “normal investment zone”. According to the 2007 plan, the size of total investment is to be RMB 1,672.26 million. The TFT-LCD Glass Substrate Project is to apply for 10 million in state support funds. All of the enterprise’s investment projects are to require loans in a total amount of 748.26 million. The debt ratio is to be 35.52%, in the “normal investment zone” after the investments are completed.

3. Keeping Secondary Business Investment Within a Reasonable Range

Currently, IRICO Group is in the midst of a period of strategic transformation and has existing secondary-business assets that can bring stable income and profit to the Group. The Group’s development plan proposes that investment in secondary industries will be controlled strictly over the next three years: the ratio of investment in secondary business to total investments will not exceed 10% within the next three years and the ratio of internal funds to total investments will reach 30% or more. IRICO Group’s investment in secondary business has been implemented in strict accordance with the *Measures* and the *System*. The Cogeneration Project, one of IRICO Group’s current secondary business investments, is a challenge from the past— with civil construction project approval from the government of Shaanxi province, [it is assisting] the city of Xianyang to improve the environment and save energy by using IRICO Group’s existing thermal energy system resources to support the production of picture tubes. Apart from this project, IRICO Group has no additional secondary business investments projects.

4. Use of Bank Credit

As of August 2007, the completed investment of IRICO Group was RMB 717.57 million, of which RMB 413.17 million was cash and RMB 304.4 million was tangible assets and intangible assets. It had not used any bank loans. A loan of RMB 748.26 million for project construction is currently in the application process. IRICO Group will use the funds of this loan reasonably in accordance with the requirements of project construction, and the finance department and other relevant departments will strictly control the use of these funds.

(6) **Strictly Implementing the Accountability System**

According to relevant provisions of the Committee’s Measures and implementing rules thereof, IRICO Group provides in the System that its investment projects must implement a project leader system. A project leader is responsible for a project feasibility report and

major events including early preparing for the project, equipment procurement, and capital utilization during implementation. If the project ultimately fails, the project leader will be penalized and an investigation into the corresponding liability will be carried out.

007

In conclusion, the investment activities carried out by IRICO Group comply with the Committee's *Measures*, the investment procedures are standardized, and the decisions are reasonable. With respect to its future investment activities, IRICO Group will continue to perform these activities in accordance with the provisions of the *Measures* and the *System* and will strictly implement the reporting system for investment activities to effectively preserve and increase the value of the state-owned assets. IRICO Group will work vigorously to accelerate the pace of innovation in the industry and speed up its strategic transformation.

Please take notice of this report.

五、投资风险管理与控制：

1. 2006 年企业主要财务数据

表 4 2006 年彩虹集团主要财务数据

数据名称	2006 年	备注
主营业务收入(万元)	508495.31	
利润总额(万元)	9968.46	
净利润(万元)	11937.41	
资产总额(万元)	829197.91	
其中：国有资产总量(万元)	379853.67	
负债总额(万元)	279127.46	
净资产(万元)	379853.67	
所有者权益总额(万元)	379853.67	
资产负债率(%)	33.66	

2. 总投资规模控制在合理的负债率内

根据《彩虹集团公司 2007-2009 年发展规划》，彩虹集团作为生产制造类的大型企业，合理的资产负债率是企业健康发展所必须追求的。小于 50%的资产负债率均在企业正常的投资区内。如果资产负债率达到 65%，则应引起高度重视，应谨慎抉择是否进一步投资。若资产负债率超过 65%，为企业投资的严格控制区，原则上在投资时不应形成新的负债。从表 1、表 2、表 4 可以看出，彩虹集团 2006 年负债率为 33.66%，处于正常投资区。2007

年计划总投资规模为 167226 万元，TFT-LCD 玻璃基板项目申请国家资金扶持 1000 万元，所有投资项目共需贷款 74826 万元，投资完成后资产负债率约为 35.52%，处于正常的投资区。

3. 非主业投资控制在合理的范围内

彩虹集团目前正处在战略转型期，现有非主业资产还可以给集团带来稳定的收入和利润，集团发展规划提出：在未来三年对非主业的投资将严格控制，三年内对非主业的投资占总投资的比重不超过 10%，且自有资金占总投资的比重达到 30% 以上。彩虹集团在非主业的投资认真按照《办法》和《制度》规定执行，截至目前彩虹集团非主业投资热电联产项目为历史遗留问题，是咸阳市为改善环境、节约能源，利用彩虹集团原有的给显像管生产配套的热力系统资源，经陕西省政府批准的市政建设项目。除此之外暂无其他非主业投资项目。

4. 银行信贷使用情况：

截至 2007 年 8 月，彩虹集团的投资完成 71757 万元，其中现金投资 41317 万元，实物资产及无形资产 30440 万元，没有使用银行贷款。对于项目建设所需 74826 万元贷款，目前正在申办中。此贷款资金彩虹集团将按照项目建设需要合理使用，财务及相关部门对资金使用情况严格控制。

六、认真落实责任追究制度

根据国资委《办法》及实施细则的相关规定，彩虹集团在《制度》中规定，投资项目实行项目负责人制度，项目负责人对项目可行性研究报告负责，对项目前期准备、实施中设备采购及资金使用等重大事项负责，项目最终未通过验收的对项目负责人进行

由 扫描全能王 扫描创建

处罚并追究相应责任。

综上，彩虹集团所进行的投资活动均符合国资委《办法》规定，投资程序规范，决策合理。彩虹集团在今后的投资活动中将继续履行《办法》及《制度》规定，认真执行投资活动报告制度，使国有资产有效地保值增值。大力推进创新产业步伐，加快彩虹集团的战略转型。

特此报告。
